

Robert P. Astorino
County Executive

Department of Public Safety

George N. Longworth
Commissioner-Sheriff

November 3, 2010

Dear Chief/Commissioner:

Westchester County recently contracted with Pictometry International (<http://www.pictometry.com>) to capture oblique (angle) aerial and street-level photography. Pictometry is subcontracting the street level photography work to FACET Technologies (<http://www.facet-tech.com/>).

We write to inform you that this project is scheduled to commence within the week, weather permitting. Aerial photography will be taken from a plane and may be noticed by your residents. The street level photography most likely will be noticed. A van, with the FACET Technologies logo and numerous mounted cameras, will go down every street, taking pictures in every direction. Your municipality's chief elected official and assessor are also being notified.

Two vans will be used for street level photography capture. One will start work within the City of White Plains, City of Yonkers, City of New Rochelle, and Town of Rye primarily in downtown and industrial areas. A second van will be deployed in the near future.

Attached is a photo of what the van looks like, and a copy of the letter of introduction each FACET employee will have to hand out as needed. If you have any questions or would like additional information, please send email to dbjl@westchestergov.com or leave a message for Tax Commission Executive Dave Jackson at 995-4328.

Sincerely,

DEPARTMENT OF PUBLIC SAFETY
Westchester County Police

George N. Longworth
Commissioner-Sheriff
