

# Village of Bronxville 2019 Safety Day

**Saturday, May 11, 2019**

**10am - 2pm  
Village Hall  
Bronxville**

## JOINING US THIS YEAR

**INTERNATIONAL CODE COUNCIL**

**FEMA**

**Home Depot**

**NYS Division of Homeland Security & Emergency Services**

**Office of Fire Prevention & Control**

**Smart Vents**

**NY Presbyterian Lawrence Hospital**

**Fire Department Smoke House**

**Bronxville Police**

**Westchester County Special Ops Division & K9 Unit**

**New York State Police K-9 Unit**

**Eastchester Volunteer Ambulance Corps**

**Advanced Cardiovascular Diagnostics**

**Sign up online for your heart testing at <https://buildingsafety.youcanbook.me>**

**For more information on testing visit <https://cardiovasculartesting.com/>**

**(Space is limited sign up today!)**

**Bring the Kids!**

**Safety Poster Contest, Prizes,**

**Bouncy Castle, Food Trucks, Give-Aways & More!**

# 2019 Safety Day

Come join us in our First Annual Safety Day, Saturday, May 11, 2019 from 10am to 2pm. We will have the following groups joining us for your benefit.

Bronxville Police Department

Eastchester Fire Department

Eastchester Volunteer Ambulance Corps.

FEMA

International Code Council

Con Ed

Home Depot

NYS Division of Homeland Security & Emergency Services

Office of Fire Prevention & Control

NY Presbyterian Lawrence Hospital

**Advanced Cardiovascular Diagnostics**

Food Trucks

Bouncy Castle

Safety Poster Contest

Westchester County  
Special Ops Division & K9 Unit

New York State Police K-9 Unit

# 2019 Safety Day

Special thanks to the following who helped make this event possible:

# 2019 Village of Bronxville Safety Day

Saturday, May 11, 2019  
10am to 2pm  
Village Hall  
Palumbo Place  
Bronxville

# International Code Council

Building Safety Month is an international campaign that culminates in May to raise awareness about building safety. The Code Council, its 64,000 members, and a diverse partnership of professionals from the building construction, design and safety community come together with corporations, government agencies, professional associations and nonprofits to promote building safety through proclamations, informational events, legislative briefings and more.

**“Building safety is about preparing for the future. The Code Council, in partnership with our members and stakeholders, develops model codes that integrate new technologies and the latest advancements in building science,”** said Code Council Board President William Bryant, MCP, CBO.

“Building Safety Month is a chance to celebrate the entire building safety community and to educate others about the importance of the codes to each and every one of us.”

“After nearly 40 years, Building Safety Month is still the primary international campaign promoting the importance of the codes in our everyday lives,” said Code Council Chief Executive Officer Dominic Sims, CBO. “Because of the enduring commitment of our members and stakeholders, the campaign reaches tens of thousands of people around the world.”

## About the International Code Council

The [International Code Council](#) is a member-focused association dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets [choose the International Codes](#).

# Advanced Cardiovascular Diagnostics

**Would you like to reduce the risk of a heart attack by 50%, stroke by 80% and abdominal aneurysm rupture by 65%?**

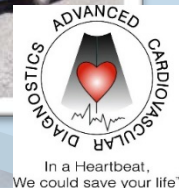

Come to our life-saving tests. (Please bring your insurance card.)

Advanced Cardiovascular Diagnostics provides state-of-the-art cardiovascular testing, detection, prevention, and solutions.

Cardiovascular disease is the leading cause of death in the United States, and it's also the most preventable.

To make an appointment, please visit <https://buildingsafety.youcanbook.me>

For any questions, please call 516-488-5050

# ADVANCED CARDIOVASCULAR DIAGNOSTICS

## WOULD YOU LIKE TO DECREASE YOUR CHANCE OF A STROKE AND DEATH FROM A HEART ATTACK?

*In a Heartbeat, We could save your life™*

**MAY 11, 2019  
9 AM - 4 PM**

**BUILDING SAFETY HEALTH FAIR EVENT  
200 PONDFIELD ROAD  
BRONXVILLE, NY 10708**

To make an appointment, please visit  
<https://buildingsafety.youcanbook.me>

For any questions, please call 516-488-5050

# ADVANCED CARDIOVASCULAR DIAGNOSTICS

## COST BENEFITS OF ADVANCED CARDIOVASCULAR DIAGNOSTICS

### ACD BACKGROUND

Advanced Cardiovascular Diagnostics (ACD) is founded by Dr. Perry Frankel, a Board Certified Cardiologist, Lipidologist, and multi-state Diagnostician. ACD provides state-of-the-art, on-site cardiovascular testing, detection, prevention, and solutions. Frankel produces and attends events for the purpose of providing easily accessible testing, which has saved many lives.

*Dr. Perry Frankel,  
a Board Certified  
Cardiologist,  
Lipidologist,  
and multi-state  
diagnostician.*

#### HEART ATTACKS

- ♥ The Cost of a heart attack can range from \$760,000 to \$1 Million
- ♥ For every Heart Attack ACD prevents, patients save up to \$1 Million in healthcare costs.
- ♥ This includes direct costs such as hospital admission, doctor and prescription drug fee
- ♥ Indirect costs may include loss of productivity and time away from work
- ♥ With ACD, the cost of a Stress Echo-cardiogram to prevent a heart attack is \$300

#### STROKE

- ♥ Following a stroke, in the first year alone, care costs \$81,750; including hospital admission.
- ♥ On average, the lifetime cost of a stroke is \$103,576 per person.
- ♥ 75% of people are unaware of the symptoms of a stroke, until after one occurs by which point 15 to 30% of survivors become permanently disabled, racking up additional costs.
- ♥ With ACD, the cost to prevent a stroke with a Carotid Ultrasound is \$200

#### ANEURYSMS

- ♥ An unruptured aneurysms can cost over \$30,000 per person to treat.
- ♥ This cost is then doubled when treating a ruptured aneurysm, for which the morbidity rate is 90%.

- ♥ Aneurysms often have no symptoms, until they rupture. ACD testing can both prevent the formation of an aneurysm or detect it early enough to prevent a rupture.
- ♥ ACD offer Abdominal Aorta Ultrasounds for \$150.

#### HYPERTENSION

- ♥ Managing hypertension costs individuals between \$740 and \$1,200 annually, however only 54% of people with hypertension have this condition under control.
- ♥ Undiagnosed or inadequately treated hypertension costs the US economy \$48.6 billion dollars per year.
- ♥ 1 in 3 Americans have high blood pressure which is linked to almost 1,000 deaths each day.
- ♥ High blood pressure is associated with 69% of heart attacks, 74% of heart failure, and 77% of strokes.
- ♥ With ACD, high blood pressure which risks damaging the patient's heart can be identified by an
- ♥ EKG test, which costs \$35.
- ♥ ACD also provides blood pressure tests, which detect hypertension, for \$75.

#### HOW TO SCHEDULE AN EVENT WITH ACD

Contact Jennifer Frankel for all scheduling Inquiries

# In a heartbeat, we could save your life.™

Advanced Cardiovascular Diagnostics provides state-of-the-art cardiovascular testing, detection, prevention, and solutions.

*Cardiovascular disease is the leading cause of death in the United States, and it's also the most preventable.*

- A HEART ATTACK OCCURS IN THE U.S. EVERY 42 SECONDS
- SOMEONE DIES FROM A STROKE IN THE U.S. EVERY 4 MINUTES

We can **protect** your life with 7 non-invasive, life-saving tests.

## ECHOCARDIOGRAM

An echocardiogram is a non-invasive ultrasound test that evaluates the structures of the heart, as well as the direction of blood flow within it.

## CAROTID DOPPLER

75% of patients that suffer a stroke do not know they have a carotid blockage. The carotid doppler can determine if you are at risk of a stroke.

## LOWER EXTREMITY DOPPLER

A Doppler ultrasound exam measures blood flow through your arteries and veins.

## TRANSCRANIAL DOPPLER

A Transcranial Doppler ultrasound measures the velocity of blood flow through the brain's blood vessels by measuring the echoes of ultrasound waves moving through the cranium.

## STRESS ECHOCARDIOGRAMS

Heart disease is the number one cause of death in America. A stress echocardiogram test can help determine if you are at risk.

## ABDOMINAL AORTIC ANEURYSM ULTRASOUND

Two-thirds of patients that have ruptured aortic aneurysms are unaware that they have one. An ultrasound can determine if you have an aneurysm.

## PULMONARY FUNCTION TESTS

Pulmonary function tests (PFTs) are a group of tests that measure how well your lungs work.
